EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE ABSTRACT:

Line 1, "comprises" has been changed to ---includes---.

Claims 1-13 are allowed.

REASONS FOR ALLOWANCE

The problem addressed by the instant method is to provide an improved system for non-contact temperature measurement and for viewing the evaporation process in a centrifugal evaporator. (See page 2, third full paragraph of the specification).

This problem is solved according to the invention in that a device or apparatus comprising a non-contact temperature sensing infra red pyrometer having a sensor with a defined field of view which is mounted in the chamber such that while the rotor as such is substantially out of its field of view, each sample container at least partly occupies the pyrometer field of view for a part of each rotation of a rotor, and the positions of the infrared source and the pyrometer components are selected so that the radiation from the infra red source does not impinge on the pyrometer sensor. (See the paragraph bridging pages 2 and 3).

UK Patent Specification 2334688, the closest prior art, discloses the use of temperature sensing probes placed in or adjacent to samples in a chamber with means for transferring the temperature data from a sensor on the rotor to a system controller remote from the rotor.

UK Patent Application 0105345.3, another close prior art, describes the use of a non-contact temperature sensing device to sense the temperature of a disc rotor, in which sample containers are fixed in position. (See page 1, second full paragraph from the bottom).

These references fail to disclose, inter alia, the apparatus described supra for solving the above problem,

Thus, the subject matter of claims 1-13 is neither disclosed by the prior art nor is obvious. The claims are deemed allowable over the prior of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 571-272-1450.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola, can be reached on 571-272-1444.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
